

The Nature of the UK Household Consumption System
Underlying Factors

Prof. Kenji Tokuda

目 次

1	Introduction	2
1.1	An awareness of the problem.	2
1.2	The consumption system.	2
1.3	Consumption is the last economic activity of a household.	3
1.4	The consumer.	4
1.5	Hypotheses to be assessed through Empirical Study and Data Analysis.	6
1.6	Framework for a consumption analysis.	11
2	Demographic factors.	13
2.1	Population	13
2.2	Income class structure	15
2.3	Age income structure	19
2.4	Other conditions	21
3	Economic factors	25
3.1	Stable Economic Growth	25
3.2	Consumer spending	27
3.3	The price of goods and services.	29
3.4	Wages and social benefits.	32
3.5	The economic impact on each generation.	35
3.6	Summary	36
4	Consumer change	38
4.1	Expenditure class structure	38
4.2	Other Scenarios.	39
4.3	Differences in expenditure elasticity.	40
4.4	Similarities and differences in the characteristics between classes.	42
4.5	Older generation verses younger generation.	43
4.6	The role of consumer credit in consumer spending	46
4.7	For retailers	49
5	Retail change	49
5.1	No-frills discounters becoming main-stream retailers.	49
5.2	Marketing changes.	53
6	Conclusion	54
6.1	Interrelationships.	54
6.2	Comparison between the UK and Japan.	56
6.3	Thoughts about consumption and retailing in Japan.	58
	編集後記	67
